RIBBON CUTTING: By Family

directed by
Sarah Woodley,
Junior Board

A LITTLE BIT ABOUT THIS HERB GARDEN

Herbs have been used throughout the centuries for many purposes in medicine, science, cooking, and just for their delightful fragrance. The world of herbs is a magic world.. once one starts experimenting with a dozen, soon a second dozen is added to the first.

Established two years ago, it now holds specimens of culinary and aromatic herbs

The sundial is a gift from Arline's very close friend of many years, Mrs. Charles Deiss.

A bronze plaque will soon be added, a gift from the family.

This garden is a teaching facility used by Hilltoppers, Indiana University students, and the community at large.

The endowment established by the family will provide the care required, special workshops, additions of other specimens and lastly the enduring reminder of a woman who believed in the vision of a garden for boys and girls- a woman who saw something beautiful for the city of Bloomington and for the nation as leaders are trained to go out into the world responsible and competent.

IN THE HERB GARDEN
